## XTRA FLUID CONCRETE

### **APPLICATIONS**

#### **Piling**

#### **High rise pumping**

#### **Congested rebar area**

#### **Slender element**

#### **casting**

#### **Retaining walls**

#### **Vertical casting**

**Xtra FLUID CONCRETE** is specially formulated to enhance the workability without bleeding or segregation. Suitable for piling, pumping to high rise structures and vertical casting. Depending on the project specifications various strength grades are available

### **Advantages**

- Easy fill void cavities
- Easy concrete compaction **reduces** vibration requirements
- Easy to fill in to formwork with congested steel reinforcement

### **Design Characteristics**

- High performance High fluid but cohesive concrete capable of placement without segregation. Allows easy pumping, placement and compaction.
- Designed as per the requirement of individual project specification including project specific durability requirements
